Reason for transferring these nuclear materials and terminate the license is: The single point level indication systems (nuclear gauges) are no longer necessary at Guayama II Plant

Complying with 10 CFR 30.36(b), we are also requesting by this mean the termination of our NRC Nuclear Material License, this termination to be **effective on March 15, 1996.** With the disposition procedure of these nuclear materials, our plant no longer will have nuclear material at our site after March 15, 1996

The removal from service of these nuclear sources will be done following the requirements of License Condition No 14 This work will be performed by Mr Mark Chapman from Fisher-Rosemount. The actual plans are to perform this work during the week of February 5, 1996

If you need additional information please contact us at (809) 864-4545

Sincerely,

Ramon A Torres
Safety Manager

CC Mrs Lee Gleba - Kay-Ray/Sensall
Mr Ben Bigio
Mr Jose H Barredo
Mr Jose M Diaz-Velez - NRC
Mr Mark Chapman - Fisher - Rosemount
