Re: Termination of licenses 45-25060-01 and 45-25060-02G.

Dear Sir or Madam,

Please, find enclosed additional information to NRC form 314.

A.2.
We have only used one type of sealed sources, Am-241, from Amersham, United Kingdom. NRC registration no: AMC.D3 These sealed sources have been assembled into our instrument at the manufacturing premises in Lund, Sweden. The instrument including the sources have then been shipped to US. The sources have not been removed from the instrument after shipment to US. Only sources assembled into our instrument in Sweden have been possessed at the premises of Herndon, VA. The complete instrument including the sources sent to US have then been shipped to the US customer. No additional sources have been kept at the premises of Herndon, VA. No waste has therefore occured

There have been no sources at the premises of Herndon, VA after October 1994.

For transfers of sold instruments, please see enclosure

B.2.
No radiation survey was conducted at the premises of Herndon, VA, since no work have been performed with the radioactive sources, see A.2. above.

I you have any questions or need any information, do not hesitate to contact me at telephone +46 40 40 55 40 or fax +46 40 40 54 14. There are a time difference of 6 hours between Sweden and Georgia. We are 6 hours before you.

Yours sincerely
Provalid AB

Anders Ohlsson, RSO
