DL-070199_02

United States Department of the Interior

GEOLOGICAL SURVEY
BOX 25046 MS 974
DENVER FEDERAL CENTER
DENVER, COLORADO 80225-0046

IN REPLY REFER TO:

DATE: 1 July 1999

TO: Ms. Orysia Bailey, Nuclear Regulatory Commission Region II

FROM: Darrell Ray Liles, USGS Radiation Safety Officer Darrell Ray Liles

SUBJECT: Consolidation of NRC Licenses

We are requesting that the USGS License 45-15923-01be transferred to the USGS License 05-01399-08 held in NRC Region IV. The isotopes and activity limits on the 05-01399-08 license allow all of the materials to be transferred from the 45-15923-01license without an amendment. Furthermore, our Region IV license allows USGS operations anywhere in the United States with approval from the USGS Central Region Radiation Safety Committee. This action has been approved by the USGS Central Region Radiation Safety Committee (NRC Region IV).
