REFERENCE:

FOUR SEASONS NUCLEAR MEDICINE  
LICENSE APPLICATION PACKAGE 1/12/99

Dear Mr. Loo:

This letter is in reference to questions you had about our license application package when you spoke to our consulting health physicist, Roy Heltzel, on January 12, 1999. The questions are addressed as follows:

1. Item 8 Training Frequency  
We will provide training as it is stated in Appendix A in giving the groups mentioned in Table 8.1 annual refresher training, if needed because of their duties.
2. Item 9.1 Annotated Drawing  
Please see attached revised drawing with indications of map scale and direction of North.
3. Item 10.14 Radiopharmaceutical Therapy  
We will use I-131 as sodium iodide capsule form only. We will not use I-131 as sodium iodide in liquid form and this will not need a radioactive fume hood.

Please contact our consulting health physicist, Roy F. Heltzel, Jr., at 757-518-9523 if there are further questions. Thank you for your help.

Sincerely,

Naeem A. Qazi, MD,  
President
