J. Robin Haden, Chief
Radioactive Materials Section
P.O. Box 27687
Raleigh, North Carolina 27611-7687

Robin:

On behalf of Rea Construction Company, I am requesting an amendment to our Radioactive Materials License 092-391-2 in Raleigh, N.C. storage 3010 Gresham Lake Road.

Amendment to add a nuclear moisture density gauge, 3400 series to our Raleigh license. This gauge was on our Virginia license and was being used in Cuba on a project with J.A. Jones Inc. The project is scheduled to last another year. We are requesting to operate the gauge under the Raleigh license on the temporary construction project in Cuba.

The Virginia operation is in the process of being sold and the license canceled. All the information as to storage and other information furnished to the NRC is enclosed with this request. The Virginia license number is 45-21217-02. The nuclear source in this gauge is as follows: 8mci; CS-137; 40mci; AM 241 BF.

Roy Flowers is the operator of the gauge and will be exposure monitored under our Landauer quarterly radiation badge readings. His certificate of Radiological Safety is enclosed.

Please contact me if any more information is needed. Thank you for your attention.

Sincerely,

Jim Smith
Q.C.&Q.A. Manager, R.S.O.
