

The quarterly status reports for those Region II sites contained on the ORNL list of formerly licensed sites identified as potentially contaminated are contained in Attachments 1, 2, and 3. The status reports for those sites with an ORNL final score greater than 300 are at Attachment 1. The status reports for those sites with an ORNL final score from 5 to 300 which have been reviewed and remain in an open status are at Attachment 2 and the reports for those sites which Region II recommends be closed and deleted from the list are at Attachment 3. The information required for the Monthly Information Status Report is at Attachment 4.

If you have any questions regarding these reports or our evaluations, please contact Mr. Jay L. Henson of my staff at (404) 331-0344.

REGION II TERMINATED SITES  
LIST

SITE STATUS REPORT

MARCH 24, 1995

Docket No. 040-08058  
01047

License No. SUC-

Licensee Name: Portsmouth  
Terminals

Site Name: Portsmouth Marine  
Terminal

Site Address: 1890 Federal  
Drive

City: Portsmouth State: VA Zip: 23707  
Regional Contact: Jay L. Henson Phone: (404) 331-  
0344

Status Summary:

ORNL Final Score:  
64

Background

In July, 1970, Portsmouth Terminal, Inc., was issued License No. SUC-01047 to possess, for storage only, 8,470 pounds of uranium as UF<sub>6</sub>. After several amendments the licensee's possession limit was increased to a maximum of 100,000 pounds.

The licensee accepted shipments of UF<sub>6</sub> contained in shipping containers (cylinders) for temporary storage (24 to 72 hours) until they could be loaded onto the next mode of transportation.

In January, 1982, the NRC determined that Portsmouth Terminals, Inc., was exempt from licensing under the provisions of Section 40.12, 10 CFR Part 40, and the license was terminated.

Since only materials in DOT/NRC approved shipping containers were handled by the licensee, the NRC determined that a closeout survey was not required.

Assessment

The ORNL reviewer of this retired docket file concluded that this license authorized the possession and use of loose materials. This license only authorized the possession for storage of licensed materials (UF<sub>6</sub>) in DOT/NRC approved shipping containers. There is no evidence in the docket file that releases occurred at the site or that any contaminated shipping containers were ever identified at the site. It is recommended that the terminated site status of this license be changed from "open" to "closed".
