Four Seasons Nuclear Medicine, Inc.  
ATTN: Naeem A. Qazi, M.D.  
President  
#9-Westwood Medical Park  
Bluefield, Virginia 24605

SUBJECT: TRANSMITTAL OF CORRECTED COPY OF LICENSE NO. 45-25454-01

Dear Dr. Qazi:

Enclosed please find your new NRC materials license. Effective July 10, 1998, the regulations at 10 CFR 35.18 were revised to withdraw the 5 years specified for the term of the license. Inadvertently, your license was written with a 5 year term. We have issued a **CORRECTED COPY** of your license with the expiration date in the year **2009**, as required by our internal procedures. We have also corrected a typographical error in Item 6.E.

Please review the document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify this office [ATTN: Ms. Diane Heim at (404) 562-4723] so that we can provide appropriate corrections and answers.

Please be advised that your license expires as stated in Item 4. Unless your license has been terminated, you must conduct your program involving byproduct materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR 19, "Notices, Instructions and Reports to Workers: Inspection and Investigations," 10 CFR 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Not possess and use materials authorized in Items 6, 7, and 8 on the license until:
  - a. you have constructed the facilities and obtained the equipment described in the license application and supporting documentation; and
  - b. you have notified the U. S. Nuclear Regulatory Commission, Region II, ATTN: Materials Licensing/Inspection Branch, in writing, that activities authorized by the license will be initiated; and
  - c. you have submitted and certified implementation of a Quality Management Program (10 CFR 35.32) for radiotherapy, or for administering >30 uCi of I-125 or I-131.

3. Notify NRC, in writing, within 30 days.
  - a. when an authorized user or a Radiation Safety Officer permanently discontinues performance of duties under the license or has a name change; or
  - b. when the licensee's mailing address changes (no fee is required if the location of byproduct material remains the same).
4. In accordance with 10 CFR 30.36(d) and/or license condition, notify NRC, promptly, in writing, and request amendment or termination of the license:
  - a. when you decide to terminate all activities involving materials authorized under the license;
  - b. when you decide to terminate licensed activities in a separate building or outdoor area identified on your license; or
  - c. if you decide not to complete the facility, acquirement equipment, or possess and use authorized material.
5. Request and obtain a license amendment before you:
  - a. receive or use byproduct material for a clinical procedure permitted under 10 CFR 35 but not permitted by your license issued pursuant to this part;
  - b. permit anyone, not authorized under 10 CFR 35, Subpart J, to work as an authorized user under a license for medical use of byproduct material;
  - c. change a Radiation Safety Officer;
  - d. order byproduct material in excess of the amount, or a different radionuclide or form, other than authorized on the license;
  - e. add to change the areas of use or address (or addresses) of use identified in the license application or on the license; or
  - f. change ownership of your organization.
6. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date of your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of byproduct material after your license expires is a violation of NRC regulations. Transfer of licensed materials must be consistent with 10 CFR 30.41, 40.51 or 70.42, as applicable. A license will not normally be renewed, except on a case-by-case basis, in instances where licensed material has never been possessed or used.

In addition, please note that NRC Form 313 requires the applicant, by his/her signature, to verify that the applicant understands that all statements contained in the application are true and correct to the best of the applicant's knowledge. The signature on the application should be the licensee or certifying official rather than a consultant.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a Notice of Violation, or imposition of a Civil Penalty, or an order suspending, modifying or revoking your license as specified in the most current version of the "General Statement of Policy and procedures for NRC Enforcement Actions," NUREG-1800. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken against those who do not achieve the necessary attention to detail and standard of compliance expected of licensees.

Thank you for your cooperation.

Sincerely,

Wade T. Loo, License Reviewer  
 Division of Nuclear Materials Safety

9. Authorized use:

- A. Any uptake, dilution, and excretion procedure approved in 10 CFR 35.100  
 B. Any imaging and localization procedure approved in 10 CFR 35.200.  
 C. and D. Any radiopharmaceutical therapy procedure approved in 10 CFR 35.300.  
 E. In vitro studies.

CONDITIONS

10. Licensed material shall be used only at the licensee's facilities located at 1279 Stadium Drive, Bluefield, West Virginia.

11. The Radiation Safety Officer for this license is Nadeem Gul Qazi, M.D.

12. Licensed material listed in Item 6 above is only authorized for use by, or under the supervision of, the following individual for the materials and uses indicated:

Authorized User

Material and Use

Nadeem Gul Qazi, M.D.

Medical use described in 10 CFR 35.11, 35.100, 35.200 and 35.300.

13. The licensee shall conduct a physical inventory every three months to account for all sealed sources and devices containing licensed material received and possessed pursuant to 10 CFR 35.59 and every six months for all other sealed sources and devices.

14. Sealed sources or detector cells containing licensed material shall not be opened or sources removed from source holders by the licensee.

15. The licensee is authorized to transport licensed material in accordance with the provisions of 10 CFR Part 71, "Packaging and Transportation of Radioactive Material."

16. In addition to the possession limits in Item 8, the licensee shall further restrict the possession of licensed material to quantities below the minimum specified 10 CFR 30.35(d) for establishing decommissioning financial assurance.

CORRECTED COPY

17. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below, except for minor changes in the medical use radiation safety procedures as provided in 10 CFR 35.31. The U. S. Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations.

A. Application dated November 17, 1998

B. Letter dated January 14, 1999 [Facsimile regarding additional information to support the application]
