RE: NRC License #45-25194-01

Dear Mr. Wright,

We understand that a qualified physician can begin serving as an authorized user immediately upon review and approval by the Radiation Safety Committee, with followup to add the physician to the License as an authorized user.

We have reviewed the following application by Judith Perrotto, MD at Page Memorial Hospital and have found her to be fully qualified to act as authorized user. MDI/Meritus will be adding her to the list of authorized user on our next amendment to the License.

Please notify us if any further action would be needed.

Sincerely,

Joel Dobson
Administrator
