re: termination of license 45-25275-01

Dear Mr. Loo:

As per our discussion of May 25, 1999, we wish to terminate our storage only material license (license number 45-25275-01). As per 53FR 24018 § 30.36 (c)(1)(iv), a completed form NRC-314 is enclosed with this letter.

In preparation for this termination request, all materials have been properly disposed as indicated on attachment A for the form NRC-314. Prior to returning the Nickel 63 detectors to their manufacturers, a swipe test was conducted on each detector. The Varian detector (serial # A6167) swipe test result was 0.7482 uCi; the other detector had a result of 0.0000 uCi. Upon receiving this result for the Varian detector, the manufacturer was contacted and we were advised to place the detector in a plastic bag, within a cardboard box and to ship the detector to them. We placed the device in a plastic bag, which was placed within a metal can, which was placed inside a cardboard box for shipment. Upon removal of the source from its storage location, a swipe test of the storage location was conducted; a result of 120 dpm was reported. Following the recommendation of Todd Mobley of Applied Health Physics Inc. (Bethel Park, PA), the storage location was wiped down with a damp cloth and a second swipe test was conducted; the result of the second swipe test was a count of "less than background".

At this point, we are in possession of no licensed materials. The latest swipe tests of the areas in which the materials had been stored showed no contamination. I am therefore requesting termination of this license.

If you need additional information, please let me know and I will be glad to provide you with whatever you need in order to terminate the license.

Sincerely,

Walter Waagner
Area Operations Manager
