Re: Termination of NRC License No. 47-21351-01

Gentlemen:

As explained in the accompanying letter from Mr. James D. Dean, Jr., Well Tech Eastern, Inc. dba Key Energy Surveys has purchased the assets of Young Wireline Service, Inc. This includes the licensed radioactive materials. There was no vacated premises surveys made, because Key Energy Surveys took over our two facilities as well, including our personnel and radiation records. I am presently employed by Key Energy Surveys in a sales capacity working out of the Dunbar WV office. I can be reached at the above telephone number.

It is my understanding that the radiation records relevant to NRC inspection of the Dunbar facility will remain there, however, Young Wireline's master radiation files, in particular personnel files and training records, dosimetry records, source data sheets, that have to be maintained indefinitely, will be transferred to Mr. Dean's office in Buckhannon and will be incorporated into his master radiation files for Key Energy Surveys. If this is not acceptable, please advise Mr. Dean.

Enclosed herewith is NRC Form 314 which has been completed to formally advise you of the disposition of the radioactive materials possessed by Young Wireline Service, Inc. If you need an inventory of those materials, you may get it from Mr. Dean. Please terminate Young Wireline's license in conjunction with the issuance of the amendment to License No. 47-21351-01.

Sincerely,

James D. Dean, Jr.
