MEMORANDUM TO: Donald A. Cool, Director
Division of Industrial and Medical Nuclear Safety
Office of Nuclear Material Safety and Safeguards

FROM: Bruce S. Mallett, Director (original signed by DM Collins)
Division of Nuclear Materials Safety

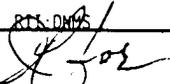

SUBJECT: STATUS REPORT OF REGION II REVIEW OF OAK RIDGE NATIONAL
LABORATORY (ORNL) LIST OF POTENTIALLY CONTAMINATED SITES

The quarterly status reports for those Region II sites contained on the ORNL list of formerly licensed sites identified as potentially contaminated are contained in Attachments 1 through 4. The status reports for those sites with an ORNL final score greater than 300 which remain open are in Attachment 1 and **those with a score** from 5 to 300 which Region II has reviewed and remain open are listed in Attachment 2. The status reports for those sites which are **recommended** for deletion are listed in Attachment 3. The sealed source files which have been reviewed and are recommended for deletion are listed in Attachment 4. The information required for the Monthly Information Status Report is in Attachment 5. A tabular summary of all files assigned to Region II is in Attachment 6.

If you have any questions regarding these reports or our evaluations, please contact Mr. Jay L. Henson of my staff at (404) 331-0344.

- Attachments: (1) Reports for sites >300 (remain open)
(2) Reports for sites <300 (remain open)
(3) Reports for sites <300 (recommend deletion)
(4) Sealed Sources (recommend deletion)
(5) Monthly Information Status Report
(6) Tabular summary for all Region II sites

SITE STATUS REPORT

OCTOBER 23, 1996

Docket No. None Noted

License No. -01-02377-01

Licensee Name: -Vester J. Thompson, Jr. Consulting Engineers (Now called TET, Inc.)

Site Name: -None Noted

site Address: -752 Savannah Street (4234 Halls Mill Road)

City: Mobile State: AL zip: None Noted
(36691)

Regional Contact: Jay L. Henson Phone: (404) 331-0344

Status Summary:

ORNL Final Score: 3.00

Background

Based on a review of available records the only information identified was an application dated February 15, 1957, regarding the former licensee's request for Cobalt-60 and Cesium-137 with a possession limit of 11,000 Curies for use in radiography of metal castings. The chemical and/or physical form requested was for Co-60 and CsBa-137-P.

Based on a review of available of records two NRC inspections had been conducted on January 8, 1958, with a followup inspection on April 21, 1958. The records indicate that during the January inspection items of noncompliance were identified and that the April followup inspection found the former licensee in compliance. Further review of available records did not reveal any information regarding disposition of byproduct material was found.

Assessment

Region II staff contacted the representatives of the former licensee and was informed that the former licensee had received a State of Alabama License, No. 147, issued on October 17, 1966. Also, licensee representatives stated that the company now was called Thompson Engineering Testing, Inc. and the radiography activities were associated with a subsidiary company called TET, Inc. From a review of available records, TET, Inc. had a State of Alabama license and had filed reciprocity with the NRC to conduct such activities in NRC jurisdiction. An inspection was conducted on July 16-17, 1996, and one item of noncompliance was identified with regards to the licensee's reciprocity form not being revised.

REGION II TERMINATED SITES LIST

SITE STATUS REPORT

OCTOBER 23, 1996

Vester J. Thompson, Jr. Consulting Engineers
752 Savannah Street
Mobile, AL

License No. 01-02377-01
Docket No. (None Noted)

Region II staff contacted the State of Alabama and determined that the licensee obtained a license from the State of Alabama to possess and use the byproduct material under State of Alabama License No. 147. Based on this information the Region II staff determined that the licensee transferred the byproduct material possessed under the NRC license to the State of Alabama license when the State of Alabama became an Agreement State.

Based upon the above assessment, it is recommended that the terminated sites status for this site be changed from "open" to "closed".
