

DL-121696-03

NOTE TO: INSPECTION FILE

FROM: ANDREA F. JONES, INSPECTOR

SUBJECT: PROVALID CLOSEOUT INSPECTION

DATE: DECEMBER 16, 1996

Provalid has two materials licenses for distribution and possession of Americium 241 to be used in the device the "Renalyzer" and has requested termination of both licenses. I arrived onsite on December 9, 1996, to confirm that Provalid did not have any sources at their Herndon facility. They did not have any sources on hand. I talked with Anders Johnson, Marketing Rep. and Sherry Cowart, Human Resources Representative. The licensee contact in the Virginia office was not available. I explained to both licensee representatives the purpose of my visit. They both indicated that no radioactive sources had ever been in their possession. Radioactive sources were shipped directly by their counterpart in Sweden to the customer where the sources were installed in the devices. They also indicated that the last device shipped to a client occurred about 2 years ago, therefore the license has not been active for quite sometime. The licensee has requested that both of their materials licenses (45-25060-01 and 45-25060-02G) be terminated and since that licensee had never possessed any material I recommend that the request be granted.
